Station St. Johann i.T. – Bus 4024 to Going (7 km) Station Kufstein – Bus 4024 to Going (24 km)

#### by plane

Innsbruck 90 km – Salzburg 80 km – Munich 130 km a shuttle service is available

## DEAR PARTICIPANTS

On behalf of the Austrian Foot Society we are honoured to welcome you to the

### **“13th International Meeting of the Austrian Foot Society” in Going.**

This Meeting will be dedicated to the Minimal Invasive Surgery, Foot and Ankle Trauma and pathologies around the ankle.

Athanasios Badekas, Alexej Barg, Jörn Dohle, Norman Espinosa, Nick Geary, Mellany Galla, Anthony Perera, Stefan Rammelt, Christina Stukenborg-Colsman, Joel Vernois and Markus Walther are world-wide known Foot and Ankle specialists. Their individual knowledge in Minimal Invasive Surgery, Foot and Ankle Trauma and complex hindfoot pathologies will contribute to a successful meeting.

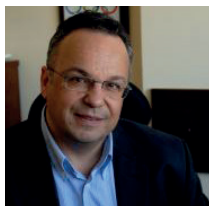

The major topics of this meeting are “Hallux rigidus, Minimal Invasive Surgery, Foot and Ankle Trauma, Foot and Ankle Arthroscopy, Achilles Tendon and complex hindfoot pathologies.

We hope you will enjoy this scientific meeting.

**Prim. Dr.  
Robert Siorpaes**

**Univ. Prof. Dr.  
Hans-Jörg Trnka**

## INTERNATIONAL GUESTS

**Athanasios Badekas**  
Greek

**Alexej Barg**  
United States of America

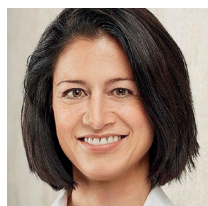

**Jörn Dohle**  
Germany

**Norman Espinosa**  
Switzerland

**Nick Geary**  
Great Britain

**Mellany Galla**  
Germany

**Anthony Perera**  
Great Britain

**Stefan Rammelt**  
Germany

**Christina Stukenborg-Colsman**  
Germany

**Joel Vernois**  
France

**Markus Walther**  
Germany

## SYMPOSIUM

THURSDAY MARCH 31<sup>ST</sup>

14:00-14:10 Welcome

R. Siorpaes, H.-J.Trnka

KEYNOTE  
LECTURE

## Hallux rigidus

Chair: Ch. Stukenborg, G. Ivanic

|               |                                                                            |                |     |
|---------------|----------------------------------------------------------------------------|----------------|-----|
| 14:10 - 14:30 | Endstage Hallux rigidus - Is there an appropriate procedure except fusion? | J. Dohle       | GER |
| 14:30 - 14:50 | How long does a Cheilectomy last?                                          | Ch. Stukenborg | GER |
| 14:50 - 15:00 | Treatment of Hallux Varus                                                  | Ch. Stukenborg | GER |
| 15:00 - 15:10 | Hallux rigidus – Will Cartiva be the Solution?                             | M. Walther     | GER |
| 15:10 - 15:20 | The Floating Toe after Hammertoe Surgery                                   | N. Geary       | GBR |

KEYNOTE  
LECTURE

## MIS Foot Surgery

Chair: P. Bock, M. Walther

|               |                                                             |            |     |
|---------------|-------------------------------------------------------------|------------|-----|
| 15:20 - 15:40 | Treatment Options with Minimal Invasive Surgery on the Foot | J. Vernois | FRA |
| 15:40 - 16:00 | The Complication of MIS Hallux Valgus Surgery               | A. Perera  | GBR |

## 16:00 - 16:45 COFFEE BREAK - VISIT THE EXHIBITION

|               |                                                                                                                                                           |                |     |
|---------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------|----------------|-----|
| 16:45 - 16:55 | MIS DMMO after Open Forefoot Surgery                                                                                                                      | J. Vernois     | FRA |
| 16:55 - 17:05 | MIS hindfoot surgery                                                                                                                                      | A. Perera      | GRB |
| 17:05 - 17:15 | 5-years Results after Minimally Invasive Chevron Osteotomy in Comparison to the Open Chevron Technique: A RCT Study                                       | G. Kaufmann    | AUT |
| 17:15 - 17:30 | My experience with lateralizing DMMO for pes adductus                                                                                                     | E. Palmanovich | ISR |
| 17:30 - 17:45 | My experience with MIS Hallux valgus surgery in Russia                                                                                                    | A. Oleynik     | RUS |
| 17:45 - 17:55 | Minimally Invasive Osteotomy of the proximal phalanges: A Shortening procedure of the lesser toes                                                         | S. Krenn       | AUT |
| 17:55 - 18:05 | Distal Metatarsal Minimally Invasive Osteotomy - A Treatment for Metatarsalgia. Pre- and Postoperative Clinical, Radiological and Pedobarographic Results | E. Neunteufel  | AUT |
| 18:05 - 18:35 | Round Table                                                                                                                                               | P. Bock        | AUT |

## SYMPOSIUM

FRIDAY APRIL 1<sup>ST</sup>

## Trauma

|               |                                   |         |     |
|---------------|-----------------------------------|---------|-----|
| 09:00 - 10:30 | <b>The Complex Ankle Fracture</b> | T. Herz | AUT |
|---------------|-----------------------------------|---------|-----|

|               |                     |  |  |
|---------------|---------------------|--|--|
| 10:30 - 11:00 | <b>COFFEE BREAK</b> |  |  |
|---------------|---------------------|--|--|

|               |                           |                |     |
|---------------|---------------------------|----------------|-----|
| 11:00 - 12:30 | <b>The Jones Fracture</b> | St. Hofstätter | AUT |
